

EKEHI

Redefining Cryptocurrency for Sustainability and Inclusivity

EKEHI

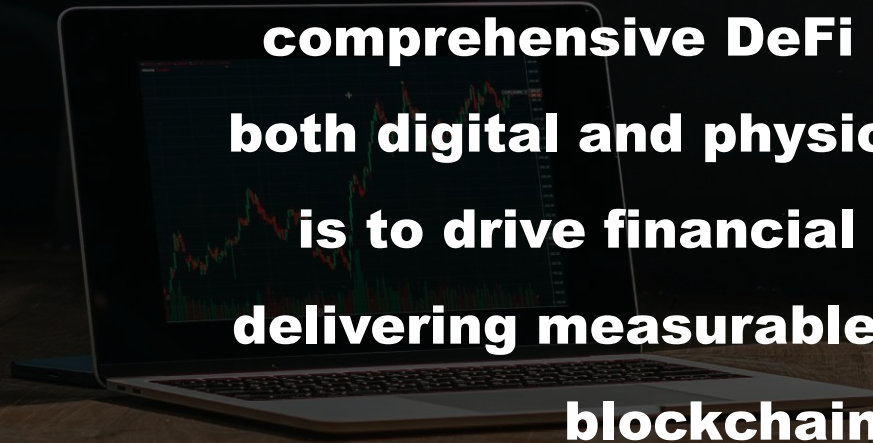

EKEHI

Bridging Digital Finance &
Social Impact

Executive Summary

EKEHI (EKH) is a deflationary
cryptocurrency project building a
comprehensive DeFi ecosystem backed by
both digital and physical assets. Our mission
is to drive financial empowerment while
delivering measurable social impact through
blockchain innovation

Investment Highlights

DEFLATIONARY TOKENOMICS

Controlled supply reduction through systematic burning until 80% of initial supply is removed

DUAL ASSET BACKING

Unique combination of physical business assets and digital ventures

COMPLETE ECOSYSTEM

Proprietary Layer-2 blockchain (EkehiChain) and DEX (EkehiSwap)

REVENUE STREAMS

Multiple sources including trading fees, staking rewards, and business operations

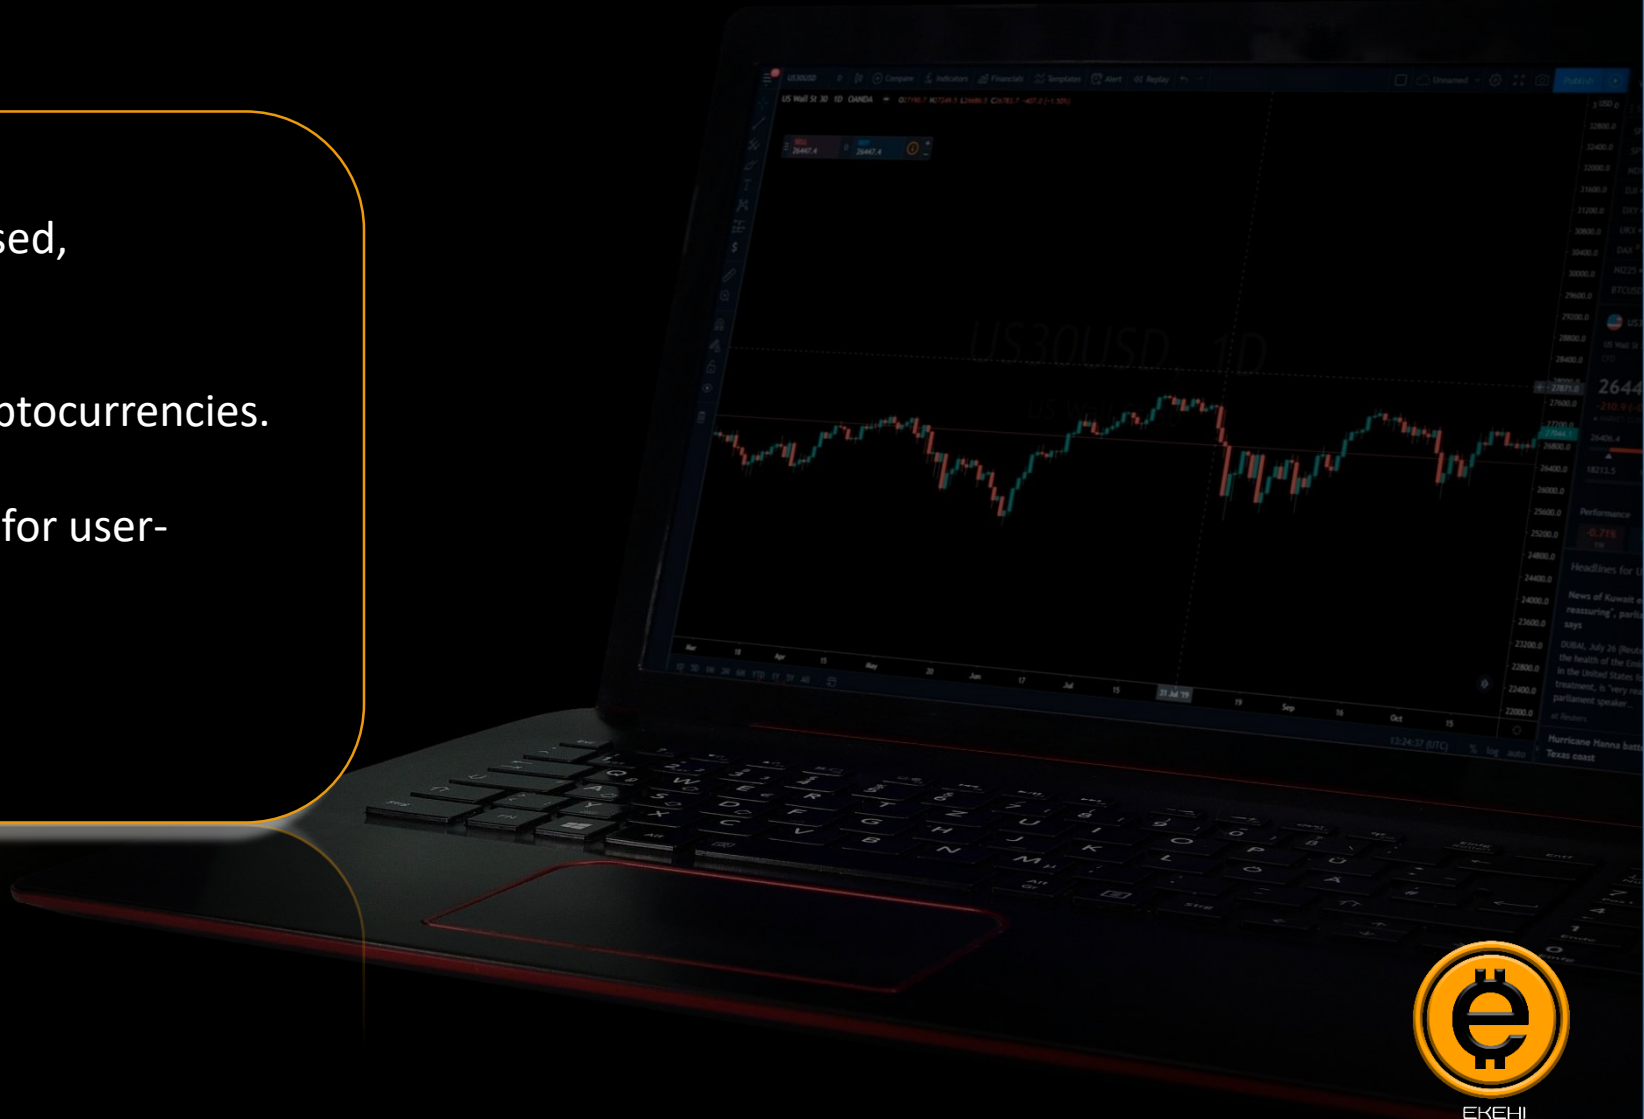

SOCIAL IMPACT

Portion of profits allocated to education, medical research, and social welfare

Market Opportunity

- Growing demand for privacy-focused, decentralized financial solutions.
- Rising interest in asset-backed cryptocurrencies.
- Expanding DeFi market with need for user-friendly, secure platforms.

Technical Infrastructure

**EkehiChain
(Layer-2
Solution)**

- Proof-of-Stake consensus mechanism
- Advanced polyBFT protocol
- Support for ERC-20, ERC-721, ERC-1155 tokens
- Built-in checkpointing for cross-chain efficiency

**EkehiSwap
(DEX)**

- KYC-free trading environment
- Multi-chain support
- Internal bridge functionality
- Competitive fee structure

EKEHI

Token Distribution

EKEHI

Revenue Model

Trading Fees

- DEX transaction fees
- Cross-chain bridge fees
- Liquidity provider rewards

Asset-Backed Revenue

- Physical business operations
- Digital venture returns
- Real estate holdings
- Technology startup investments

Staking Returns

- Validator rewards
- Liquidity mining
- Governance participation

Competitive Advantages

Hybrid Asset Backing

- Traditional business assets
- Digital venture portfolio
- Real estate holdings

Privacy Focus

- KYC-free trading
- Decentralized infrastructure
- User anonymity protection

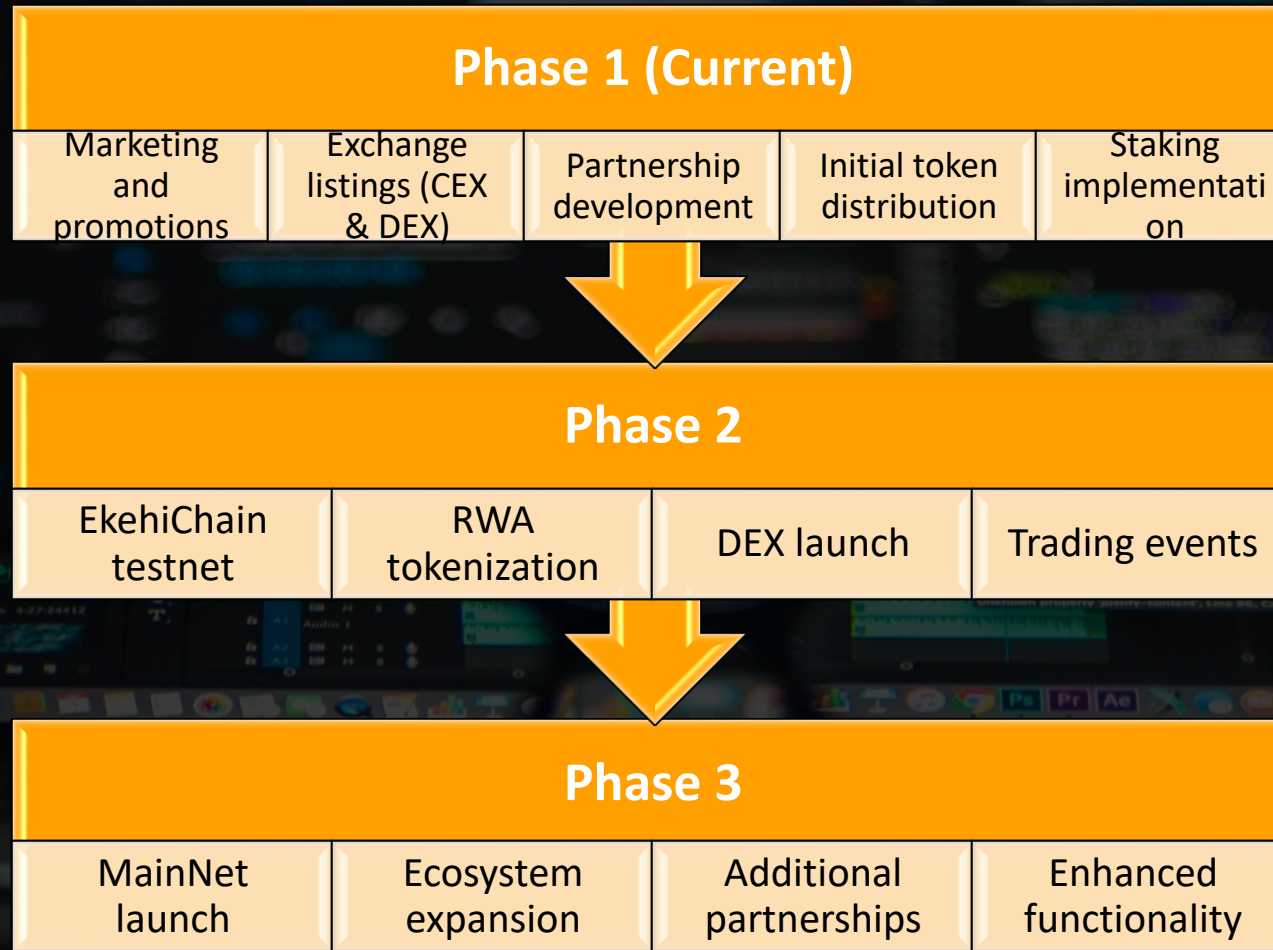

Social Impact Integration

- Transparent profit sharing
- Educational initiatives
- Medical research funding
- Community development

Development Roadmap

Investment Requirements

Funds will be allocated to:

- ❖ Technical infrastructure development.
- ❖ Market expansion.
- ❖ Liquidity provision.
- ❖ Partnership development.

Seeking private investment to accelerate development and expansion.

EKEHI

EKEHI
ECOSYSTEM

EKEHITOKEN

The native cryptocurrency of the ecosystem designed to be a leader in sustainable cryptocurrency. It is environmentally friendly, energy-efficient and supports global sustainability goals.

EKEHICHAIN

The Blockchain platform focusing on security, transparency and efficiency aiming to revolutionize multiple industries through decentralized solutions.

EKEHISWAP

Collaborates with businesses, organizations and individuals who shares its vision of promoting sustainability through cryptocurrency and blockchain technology.

EKEHISTAKE

Offers an innovative staking mechanism that allows users to earn rewards by holding and staking their tokens, supporting the growth and stability of the ecosystem.

EKEHIFOUNDATION

A Charity Leveraging blockchain for efficient and transparent giving, aiming to maximize the impact of donations to address social and humanitarian issues globally.

RWA TOKENIZATION

Digitizes RWA on the EKEHI blockchain, making them easier to trade, increasing liquidity, and broadening investor access. It streamlines asset management and enables fractional ownership, enhancing efficiency and transparency in transactions
